DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 2. Claims 1-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ancarani Restelli in view of Bellio et al.

Ancarani Restelli discloses in he Figure, lines 12-33 of column 1, and in lines 29-35 of column 3 a gear shifting system for a bicycle transmission which operates in three modes, a manual mode, an automatic mode, and a programming mode wherein control of the transmission comprises actuating a controller 11 to enter the programming mode in which a rider manually shifts the bicycle transmission through selected gears; storing bicycle speeds for the selected gears associated with the manual shifts; the controller defining speed ranges for the selected gears; automatically shifting the bicycle transmission when operating in the automatic mode by measuring a current bicycle speed; determining a current gear of the bicycle transmission; comparing the current bicycle speed with a defined speed range for the current gear; and shifting the bicycle transmission from the current gear to another gear when the bicycle speed in outside the defined speed range for the current gear. The gear shift system in addition to the controller comprises a wheel speed input sensor 12; a gear control output 17,18; a display 23 which Ancarani Restelli further discloses in lines 33-45 of column 2, displays at least the current bicycle speed as well as the current gear ratio; a mode selector; a shifter; and a memory 30 on which a computer program is recorded.

Art Unit: 3682

Ancarani Restelli does not disclose automatically shifting the bicycle transmission when operating in the automatic mode by using only bicycle speed. However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to eliminate parameters other than bicycle speed for bicycle transmission shifting, since omission of an element and its function where not needed is obvious to one of ordinary skill in the art. *Ex parte Rainu*, 168 USPQ 375 (PTO Bd. of App. 1969). Subject matter is not patentable in absence of showing unexpected result[s] flowing from such omission. *In re Wilson*, 153 USPQ 740 (CCPA 1967).

Ancarani Restelli does not specifically disclose said actuating of said controller to enter the programming mode while the rider is actually riding the bicycle. However, Bellio et al. teaches at least in line 46 of column 11 to line 16 of column 12 a calibration mode of a bicycle transmission control system wherein a control stores rider selected gear shifting parameters; said calibration mode being executed while the rider is riding the bicycle. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the apparatus of Ancarani Restelli in view of the teachings of Bellio et al. to actuate the controller to enter a programming mode while the rider is actually riding the bicycle so as to accurately establish and store desired bicycle speeds.

Regarding claims 5,12, and 27, shifting the bicycle transmission into the lowest gear upon actuation of the setting mode would be inherent so that all of the gears of the bicycle transmission will be manually selected during the setting mode thus ensuring a speed range is defined for all selectable gears.

Art Unit: 3682

Response to Arguments

3. Applicant's arguments with respect to claims 1-32 have been considered but are moot in view of the new ground(s) of rejection. Ancarani Restelli may or may not disclose actuating the controller to enter the programming mode while a rider is actually riding the bicycle. See lines 33-53 of column 2 in conjunction with lines 29-35 of column 3 for disclosing the controller being positioned on the handlebar; said controller having actuating keys through which a cyclist programs the memory for particular personal operation. Regardless, Bellio et al. clearly teaches actuating a controller to enter a programming mode while a rider is actually riding a bicycle.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy P McAnulty whose telephone number is 703.308.8684. The examiner can normally be reached on Monday-Friday (7:30-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bucci can be reached on 703.308.3668. The fax phone numbers for the organization where this application or proceeding is assigned are 703.872.9326 for regular communications and 703.872.9327 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703.308.1113.
